(54) Title: IMPROVEMENTS RELATING TO COMMUNICATIONS DATA MANAGEMENT

(57) Abstract: A method of a recipient processing a received e-mail to cause data interaction is described. The method comprises: reading a text-based data structure within the text body of the received e-mail message; identifying some pre-stored data of the recipient by use of the data structure; and causing an interaction to occur with the pre-stored data, the interaction being determined by the contents of the received e-mail.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
